

Keystone XL Truth

I wrote [here](#) recently about Tom Steyer and his mission to stop the pipeline. He, along with Bill McKibben, 350.org, the Sierra Club, and a growing universe of activists are building what we all hope is an inarguable case against the pipeline and the tar sands. We are trying to make the movement against KXL inexorable.

Here is the first of Tom Steyer's video spots, airing nationally, against the pipeline and the tar sands. For more, go to [Keystone Truth](#) and to Steyer's [NextGen Climate Action](#).

Don't believe Tom Steyer? How about [21 Nobel peace and science laureates](#)? They're against the tar sands too and want the EU to immediately implement its Fuel Quality Directive. This would ban tar sands oil from Europe.
